

# Help build a healthier future for you and your community through In Our DNA SC, a community health research program offered to you at no-cost through MUSC

## How do I get involved?

Provide research consent + Provide a saliva sample for DNA collection

Our partner, Helix, will read your DNA (the genetic information that is unique to you).   MUSC will share health information from your medical record

### Results

Helix will return your DNA results to you at no cost

Secure DNA test results

Your DNA health results will be returned to your medical record

Common Cancers  
Heart Disease

Option to create a Helix account to learn about your DNA health results, ancestry and traits

Ancestry, Traits, Health

#### Taking action:

If you have a finding, you will be able to speak to a genetic counselor at no cost to you. You and your healthcare providers can also take action to prevent, detect early, or lessen the impact of the condition.

### Research

MUSC and Helix will create two research databases, including your medical record and DNA information.

Secure data storage

MUSC research database (local research)

Helix Research Network database (national research)

Other Health Systems

#### Genetic research findings

Our goal is to safely and securely support research that could empower healthcare providers to better understand and treat disease.

#### Enhancing Community Health

Your participation may improve healthcare for you, your family, and your community.
